RFP# 028-1617 Core Network Equipment Upgrade

ADDENDUM NO. 1 –QUESTIONS AND ANSWERS

Please see below for questions related to RFP # 028-1617:

1. Can a Diagram of the current Core be provided? **Answer:** We can provide physical access to the location for you to take your own notes. Posting a diagram as requested could cause a security breach.

2. Can you provide a Show Mod and Show Inventory on the 6506 switches? **Answer:** Will provide.

3. How are things connected today? **Answer:** Currently, it is connected by A T & T ASE fiber network.

4. Do the (4) new 10G switches need any 1G ports? **Answer:** No. If so, do those ports need POE? Not applicable

5. Do these need a license for routing? **Answer:** Not applicable.

6. Does SLPS want the ports to be RJ45 or SFP+? **Answer:** Our preference is SFP+.

7. Do you need optics for the SFP+ ports? **Answer:** Yes.

8. How long are the fiber runs that will be attached to the SFP+ ports? **Answer:** No more than 10 feet.

9. Does the router that will replace the 3925 need any WAN or VOIP interface cards? (T1s for example) **Answer:** No.

10. How many 10G ports are required on the router? **Answer:** 1.

11. Is any licensing for VOIP, advanced routing or encryption required? **Answer:** No VOIP involved. Include others as optional.

12. What is SLPS needing in terms of a response to Attachment A within RFP Attachment G? **Answer:** Attachment A, on page 17 of the RFP outlines the expectations of the winning vendor. Attachment G represents the agreement that winning vendor will be held accountable to.
