## Rebecca PriceJones

My name is Rebecca PriceJones and I have many years of experience as a Middle School Science Teacher and Assistant Principal Leadership in the Private Sector. Therefore, I take pride in being a Stellar Educator, who has maintained a level of excellence, a consummate planner and executor of those plans. I have worked tirelessly and dedicated many hours to my career. I've learned to establish a healthy balance between work and other areas of my life. I have the ability to communicate and apply leadership skills within a shared decision making model. To evaluate the instructional process with knowledge and experience in improving academic achievement.

My educational background includes a B.A. in Clinical Psychology and Early Childhood Education, 1982, M.A. in Science, 1993 and a M.A. in Education 2007. I have received many Teaching Awards, created and implemented educational programs, activities, teacher evaluations, written and monitored curriculum implementation as Science Department Chair. All with the ability to do what's best for students.

To conclude I have a heart of goodwill for my community to service adults, and children, always working towards self- improvement, respect, collaboration and parental support.
