July 1, 2018

Special Administrative Board and Citizens of the City of St. Louis
Saint Louis Public Schools
801 N. 11th Street
St. Louis, MO 63101

Dear Special Administrative Board and Citizens,

One of the key building blocks for Saint Louis Public Schools is the District's Transformation Plan. This is our roadmap to develop a system of excellent schools. The Transformation Plan was introduced during the 2014-2015 school year and features the Transformation Plan Oversight Committee (TPOC), which meets regularly to review projects, make recommendations, and ensure progress continues. The Transformation Plan is the strategic priority for all District staff.

The Transformation Plan is reviewed annually or biennially by a diverse committee of stakeholders that includes District staff, community members and families. Based upon feedback received, we revise the plan's goals and key performance indicators, as needed, to meet our present circumstances.

Transformation Plan 1.0 and 2.0 focused on regaining Full Accreditation, a benchmark we met in January 2017. Transformation Plan 3.0, which is a revision and update new this year of our previous Transformation Plans, focuses on five primary goals that will allow our district to operate at a higher academic level, develop an inclusive environment for students and staff, and relentlessly use data to accomplish our goals. The goals are listed below:

- 1. The District creates a system of excellent schools.**
- 2. The District advances fairness and equity across its system.**
- 3. The District cultivates culturally responsive school leaders, teachers and support personnel.**
- 4. All students learn to read and succeed.**
- 5. Community partnerships and resources support the District's Transformation Plan.**

On April 5, 2016, voters overwhelmingly approved Proposition 1, the first operating tax levy increase to support the district in 25 years. Proposition 1 funds will continue to have a large impact on the 2018-2019 budget. The funds will be used to continue to support early childhood education, expand character and alternative education options, improve safety and security equipment and personnel, and offer more competitive salaries to teachers and staff. The additional \$0.75 per \$100 of assessed valuation property tax increase will generate an estimated \$28 million per year for SLPS and charter schools in St. Louis City.

Reading has always been important, but this year, the Academics Department is approaching literacy with renewed focus. Our reading initiative will include systemic training and tracking tools for staff, differentiated reading instruction and timely, effective interventions for students. Reading will become the instructional focus, and an increased culture of literacy will be established and nurtured in every school.

In order for students to engage with curriculum, they must be in a learning environment that embraces them, not just as young learners but also as individuals worthy of respect. This respect cannot be established without connecting instruction to the variety of cultural backgrounds in the classroom. This year, staff will begin professional development to help them develop into culturally responsive educators.

In accordance with the goals and objectives enumerated within Transformation Plan 3.0, we are pleased to present the Saint Louis Public Schools annual operating budget for the fiscal year beginning July 1, 2018 and ending June 30, 2019.

The total proposed general operating budget (GOB) is \$303,000,000. The proposed budget for all funds is \$392,490,507.

The Saint Louis Public Schools mission:

**“We will provide a quality education for all students and enable them
to realize their full intellectual potential.”**

The proposed budget for FY 2018-2019 focuses on the needs of students and provides funding to further our mission. Funds have been allocated to our campuses for the development of new programs and initiatives as outlined in Transformation Plan 3.0 and the continued support of programs that have proven to be successful. The ensuing pages of this publication provide an overview of the District and details relative to the District sources and uses of funding.

In the upcoming years, it will be imperative that we revisit the many opportunities for greater operational efficiencies and cost savings. We will approach these opportunities and the many challenges that are ahead with transparency, improved depth, quality, and clarity of information to all of our stakeholders. We will do our very best to minimize the negative impact to the services most needed, and we will undertake these efforts with care and concern for our students, community, and employees. As always, we seek the public’s awareness and participation in this challenging effort.

Respectfully,
Kelvin R. Adams, Ph.D.
Superintendent, Saint Louis Public Schools

Saint Louis Public Schools – Vision, Mission and Core Beliefs

VISION

Saint Louis Public Schools is the district of choice for families in the St. Louis region that provides an excellent education and is nationally recognized as a leader in student achievement and teacher quality.

MISSION

We will provide a quality education for all students and enable them to realize their full intellectual potential.

CORE BELIEFS

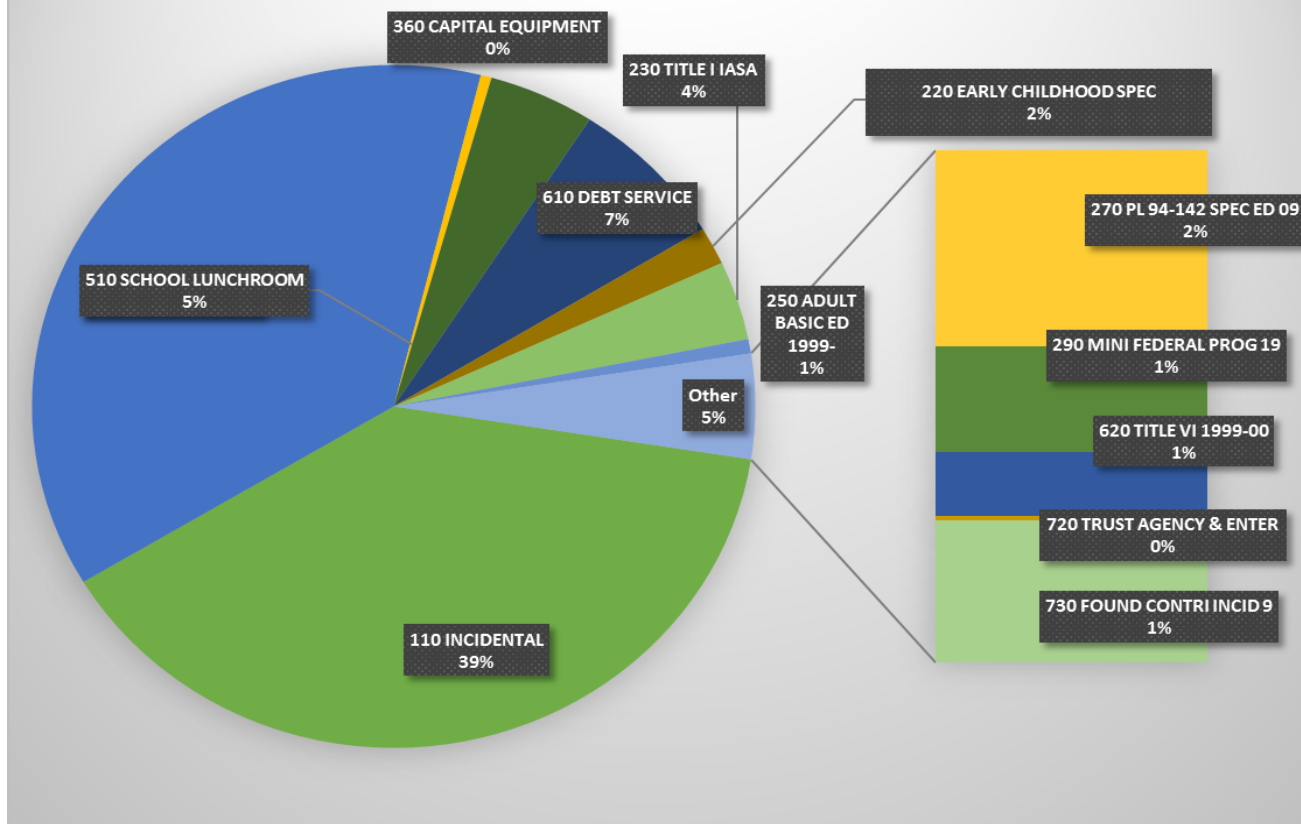

- ❖ All children can learn, regardless of their socioeconomic status, race, or gender
- ❖ The African American Achievement Gap can be eliminated
- ❖ Parents must be included in the education process
- ❖ Competent, caring, properly supported teachers are essential to student learning
- ❖ The community must be involved in encouraging high achievement for all children
- ❖ The Saint Louis Public Schools are obligated to help students overcome any obstacles that may hinder their learning by forming partnerships with the entire community

FY 2019 Adopted Budget

St. Louis Public School – Organizational Chart

District Overview

The Transitional School District of the City of St. Louis (known as the Saint Louis Public Schools prior to the time the Special Administrative Board was vested with power to govern the District) is a K-12 public school district in the City of St. Louis, Missouri. The District was originally organized in 1833. In 1838, the District opened its first school, and in 1853, the District opened the first co-educational high school west of the Mississippi River. The District encompasses approximately 61 square miles and is coterminous with the corporate limits of the City of St. Louis, Missouri. The present estimated population of the City of St. Louis, and therefore the District, is 308,626.

Under a March 22, 2007 decision, the Missouri State Board of Education declared Saint Louis Public Schools as unaccredited. In accordance with the laws of the State of Missouri, the governance of the school district was transferred from the divested board, except for auditing and reporting matters, and placed with the Special Administrative Board (SAB) of the Transitional School District.

The transitional school district is subject to all laws pertaining to “seven-member districts,” as defined in section 160.011, RSMO. In keeping with state statutes, the governing board of the transitional school district shall consist of three members: one shall be a chief executive officer nominated by the state board of education and appointed by the governor with the advice and consent of the senate, one shall be appointed by the mayor of the city not within a county and one shall be appointed by the president of the board of alderman of the city not within a county. The SAB took full control of the operation of the Saint Louis Public School District on June 15, 2007. Generally, the SAB responsibilities are to set policy for the District to ensure efficient operations, to select and evaluate the Superintendent of Schools, to adopt an annual budget and its supporting tax rate and to foster good community relations and communications. The District regained full accreditation on January 10, 2017.

District Accreditation

On January 10, 2017, after noting substantial improvements in several areas including: stable leadership; curriculum alignment; assessment, instruction, and professional development; data collection; federal compliance and financial management, the State Board of Education voted unanimously to restore the District to full accreditation status.

At the time of the loss of accreditation in 2007, the District had three (3) Annual Performance Report Points (“APR”) pursuant to the Missouri School Improvement Program. According to the Understanding Your Annual Performance Report (“UYAPR”), a K-12 school district was required to have earned between six (6) and eight (8) APR points, including at least one Missouri Assessment Program (“MAP”) point to qualify for Provisional Performance Accreditation. To qualify for Full Accreditation, a K-12 school district was required to have earned at least nine (9) APR points. At the time of the recent decision to restore the District to Provisional Performance Accreditation the District had earned seven (7) APR points, including one (1) MAP point satisfying the objective criteria set forth in the UYAPR.

In addition to earning the requisite number of APR points necessary to qualify for full accreditation, the SAB and administration have addressed many of the original concerns raised by DESE, the Special Advisory Committee on SLPS, and the State Board of Education.

Level of Education Provided

The District provides educational programs to students of all ages through its early childhood, kindergarten through 12th grade, alternative and adult education programs. In addition, the District operates four community education full-service schools that offer educational and recreational programs to students and adults of all ages.

The grade configuration of the District was reorganized in 1980. Prior to that year, the elementary schools served grades K-8 and the secondary schools served grades 9-12. Under the reorganization, middle schools were established for grades 6-8 and elementary schools for grades PK-5. A “cluster” system was instituted in which elementary schools became feeders to middle schools. Clusters were formed based upon racial composition of pupil population, school location and the number of classrooms needed in each building.

Early Childhood Program

The SLPS Early Childhood Education Program is a tuition-free, full-day program. The District operates 138 classrooms at 44 campuses for children of SLPS residents between the ages of 3-5 years old. Forty-one of these classrooms are operated at SLPS magnet campuses. The District’s campuses accommodate children with developmental delays including two classrooms at Gateway-Michael School for medically fragile preschoolers. Gifted preschoolers are served in two classrooms at Mallinckrodt Elementary School, one classroom at Kennard Classical Junior Academy, and one classroom at Columbia Elementary School, while preschoolers who are deaf or hard of hearing have opportunities to participate with hearing peers at Sigel Elementary School. In FY 2018, SLPS served 2,200 students in the Early Childhood Education Program.

One distinction of the SLPS Early Childhood Education Program is that enrolled students receive a quality education taught by certified teachers at no cost to resident families. Instructional outcomes and facilities for the preschool experience follow licensing guidelines and best practices/policies issued by the State of Missouri. Improved educational outcomes and kindergarten readiness are the primary focal points of the SLPS Early Childhood Education Program. The SAB and District administration believe that the investment in early childhood education is among the most important education reform efforts that have been implemented since the SAB took control of District operations in 2007.

Elementary School Program

Approximately 12,569 students are projected to attend the District’s 51 elementary schools, elementary/middle schools and elementary level program sites in FY 2019. Elementary schools (grades PK-5 and PK-8) offer mathematics,

communication arts (reading, writing, speaking, and listening), science and social studies. Arts and physical education are also provided.

Middle School Program

FY 2019 middle school enrollment is projected at 3,259 students. SLPS operates 9 middle schools. Middle schools (grades 6-8) offer mathematics, communication arts, science and social studies. Additionally, the middle schools offer art, business education (in magnet schools), foreign language (in magnet schools), home economics, industrial arts, music (vocal and instrumental), physical education, career awareness and orientation, counseling, remedial reading and mathematics, and athletic programs.

High School Program

High school enrollment for FY 2019 at the District's 14 high schools is projected at 5,788 students. High Schools offer English (complete sequence), mathematics courses (basic mathematics through calculus), science (complete sequence), social studies (complete sequence), foreign language (four years of French, German or Spanish districtwide and Chinese, Arabic and Russian at a single site), career technical education courses, music (vocal and instrumental), physical education, and athletic programs (all sports).

Special Education Program

Local school districts are responsible for ensuring a Free Appropriate Public Education (FAPE) for students requiring special education services. Special education services were federally mandated in 1975 by the passage of the Education for All Handicapped Children Act. This legislation was later modified and became the Individuals with Disabilities Education Act (IDEA). IDEA requires states to provide services for children with special education needs as a condition of receiving federal funds. The SLPS budget for Special Education is a combination of state, local and federal funds and is used to serve the needs of approximately 3,624 students between the ages of 3-21. At all grade levels there is a range of services for special education and guidance services. In addition, the District operates alternative programs for students with specialized needs.

Magnet School Program

Within the District's elementary, middle and high schools, there are magnet schools. In addition to a basic curriculum, magnet schools offer a specific focus, making it possible to match a student's unique needs or interests with a compatible teaching method and/or emphasis. The District operates 28 magnet schools, serving more than 11,000 students. Magnet schools have entrance requirements similar to those required for students to enroll in St. Louis County public schools that participate in the Voluntary Inter-District Choice Corporation (VICC) student transfer program. In addition to SLPS magnet schools, the District also provides several additional themed schools, including the Nahed Chapman New American Academy, Carnahan High School of the Future, Northwest Academy of Law, Clyde C. Miller Career Academy and the Bertha Gilkey Pamoja Preparatory Academy (African-centered education). These are all small schools that focus on serving targeted populations of students in the District.

Career and Technical Education

(CTE) Program Career and Technical Education (CTE) provides experiential activities that demonstrate the practical application of school-related subjects in the real world. Classroom speakers discuss job readiness, life skills, college and post-secondary training expectations and career exploration options. CTE provides technical training and resources that promote high academic achievement while preparing students for successful careers in various technical trades. CTE at SLPS includes some 60 teachers and more than 30 programs within various technical subject areas.

Programs are supported by specialists with knowledge and expertise in their specific CTE pathway, e.g., aviation maintenance, culinary arts, database management. Programs are required to have a current, industry-based curriculum supported by a sequence of courses, an applicable technical skills assessment, student organization affiliation, and a

transition agreement to post-secondary education training. The CTE Department reports all core data pertaining to the programs to the Department of Elementary and Secondary Education. CTE programs receive state and federal funding based upon this data, and this data has been used to attain MSIP points toward accreditation.

Budget Overview

Statement of Missouri Statute

Revised Statutes of Missouri Section (RSMo) 67.010 establishes the legal basis for budget development for public school districts in the State of Missouri. The following are the legal requirements as outlined in the Statute.

Each political subdivision of this state, as defined in section 70.120, except those required to prepare an annual budget by chapter 50 and section 165.191, shall prepare an annual budget. The annual budget shall present a complete financial plan for the ensuing budget year, and shall include at least the following information:

- A budget message describing the important features of the budget and major changes from the preceding year;
- Estimated revenues to be received from all sources for the budget year, with a comparative statement of actual or estimated revenues for the two years next preceding, itemized by year, fund, and source;
- Proposed expenditures for each department, office, commission, and other classification for the budget year, together with a comparative statement of actual or estimated expenditures for the two years next preceding, itemized by year, fund, activity, and object;
- The amount required for the payment of interest, amortization, and redemption charges on the debt of the political subdivision;
- A general budget summary.

In no event shall the total proposed expenditures from any fund exceed the estimated revenues to be received plus any unencumbered balance or less any deficit estimated for the beginning of the budget year. Provided, that nothing herein shall be construed as requiring any political subdivision to use any cash balance as current revenue or to change from a cash basis of financing its expenditures.

Funds and Fund Types

The annual budget for Saint Louis Public Schools is prepared and organized on the basis of funds. A fund is an independent fiscal and accounting entity that is comprised of its own assets, liabilities, fund balance, revenues, and expenditures. In accordance with Revised Statutes of Missouri (RSMo) Chapter 165, school districts in Missouri are required to budget and account for monies under the framework of four funds: (1) Teachers Fund, (2) Incidental Fund, (3) Capital Projects Funds, and (4) Debt Service Fund. Under the guidelines set forth by the Missouri Department of Elementary and Secondary (DESE) in the Missouri Accounting Manual, Saint Louis Public Schools establishes the annual budget based on the following fund type structures: Governmental, Proprietary, and Fiduciary.

Governmental Fund Types

Governmental funds are those through which most governmental functions typically are financed. The acquisition, use, and balances of the government's expendable financial resources and the related current liabilities, except those accounted for in Proprietary Funds, are accounted for through governmental funds. The following is a list of the major governmental fund types and descriptions for the funds that are budgeted on an annual basis:

1. General Fund (Incidental Fund) – a fund used to account for all financial resources except those required to be accounted for in another fund.
2. Special Revenue Fund (Teachers Fund) – a special revenue fund used to account for financial resources and expenditures for certified employees involved in administration and instruction. It includes revenues restricted by the State of Missouri and taxes allocated to the fund based on the District's tax levy to be used for the payment of teachers' salaries, related benefits, and tuition for students.

3. Capital (Building) Projects Fund – a fund used to account for financial resources and expenditures related to the acquisitions or improvement of land, buildings, and equipment.
4. Debt Service – a fund used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs.

The other governmental funds of the District are considered non-major. These funds are special revenue and permanent funds that include grant and other resources that are restricted to a particular purpose.

Proprietary Fund Types

Proprietary funds are used to account for ongoing organizations and activities, which are similar to those often found in the private sector. An Internal Service Fund is used to account for costs of the District's limited self-insurance program and to account for the activities of the SLPS Health Benefits Trust, which accumulates resources for the payment of health and welfare benefits primarily on behalf of and for the benefit of the District's employees, retirees and their dependents.

Fiduciary Fund Types

Fiduciary funds are used to account for transactions related to amounts received in an agency capacity on behalf of individuals, private organizations, and other governmental units. The District has no equity interest in this fund. The District's agency fund is used to account for monies placed in escrow that represent the District's retirement contribution to the Public School Retirement System of the City of Saint Louis.

Basis of Accounting and Financial Reporting

Annual budgets for the activities of the major funds (General Fund, Special Revenue Fund, Capital Projects, and Debt Service Fund) are prepared on a basis consistent with generally accepted accounting principles (GAAP). GAAP uses the accrual basis of accounting, a method of accounting also used when government-wide financial statements are prepared. Government-wide financial statements provide a summary of non-fiduciary activities of the major funds. Under the accrual basis of accounting, revenues are recorded when earned and expenses are recorded when a liability is incurred.

It is important to note that property tax revenues and other Governmental Fund financial resources are recognized under the "susceptible to accrual" concept. Property taxes are the largest revenue source for the District, and they are recognized in the year for which levied. The District generally considers property taxes available if they are due before year-end and are collected within 60 days after year-end. Additionally, grants are similar, and recognized when all eligibility requirements imposed by the grantor have been met. Grant revenues are recognized when reimbursable expenditures are made, except in the School Lunchroom Fund where revenue recognized is based on the number of children served. Charges for services and miscellaneous revenues are recorded as revenues when received in cash because they are generally not measurable until actually received. Investment earnings are recorded as earned since they are measurable and available.

Budget Document and Process

The budget is the official historical record and financial planning document for the District. It is prepared annually and in accordance with local, state, and federal statutes and policies. The budget provides information on the academic and operational initiatives and priorities. It also conveys the District's financial strategy to the governing body, administration, staff, community, and other stakeholders. The annual budget is prepared and approved prior to the beginning of the fiscal year, which begins on July 1. The annual budget is adjusted throughout the fiscal year through formal approvals and

budgetary transactions. These adjustments are made to meet the needs of our students, and to appropriately allocate resources to enhance the educational experience for all students.

The budget process is cyclical and ongoing in nature with activities performed throughout the entire fiscal year (July 1 to June 30). The budgeting process is comprised of five major phases: (1) Planning, (2) Preparation, (3) Adoption, (4) Implementation, and (5) Evaluation. The focus of the budgeting process is to align the District's financial and staffing resources with academic and operational plans, and to ensure that the District meets the statutory obligations and requirements for approving and adopting the annual budget.

Budget Process Diagram

Budget Planning (October – February)

The Budget Planning phase is initiated with the establishment of the budget calendar. The budget calendar establishes the annual process and provides a schedule for all activities required for developing the annual budget. The budget calendar is prepared and distributed by October.

A major component of the annual planning process is the review of the District's long-term financial modeling tool. The District recognizes the necessity of prudent management of its finances in order to ensure its long-term viability for students and communities. As a result, the District is committed to a long-term approach to financial planning. The staff in the Finance Division frequently reports on the District's five-year financial outlook which takes into consideration various enrollment and financial scenarios that may affect local, state, and federal resources. The information derived from these scenarios provides relevant financial data to District leaders and the Special Administrative Board (SAB) for long-term strategic planning. This information may also influence decisions regarding the District's current and future priorities and initiatives.

Budget Preparation (March – April)

Through strategic planning, the District establishes annual priorities and initiatives for the upcoming year. In the Finance Division, the staff analyzes projected revenue estimates determined by long-term forecasting to allocate available resources to support the District's strategic plans. Appropriation levels are determined for schools and central office divisions and departments to support anticipated expenditures.

District staff positions are funded from grant and non-grant resources. Most staff positions at the school locations are funded from non-grant resources, and are determined based on a human resources allocation model. This staffing model is designed to ensure the dual aim of ensuring equity in the distribution of District resources and compliance with the Missouri Department of Elementary and Secondary Education standards. The staffing model uses the mid-point average between the Minimum and Desirable Pupil-Teacher-Ratios (PTRs). Grant funded positions at the school level are allocated based on program requirements, specific school needs, and District initiatives. Positions allocated at the central office level are primarily funded by non-grant funds, and are determined based on human resource needs and District initiatives.

Building principals and central office leaders meet annually with the Human Resources and Finance Division staff to clarify human resource allocations, address staffing concerns, and request additional resources. Additional requests beyond the allocation model and initial allocation may be allocated based on school and central office needs assessments. All needs assessment-based allocations require approval from the Superintendent. The full-time equivalent (FTE) count of budgeted personnel is presented in detail as part of the annual budget. Pursuant to Missouri State Law, the proposed annual budget must be balanced, meaning the approved estimated expenditures for each fund cannot exceed the estimated available revenues to be received plus any unencumbered balances or less any deficits estimated for the beginning of the budget year.

In the Finance Division, the finance staff prepares and distributes electronic budget development workbooks to building principals and central office leaders. The budget development workbooks assist leaders with aligning academic and operational plans with resources, and provides guidance on how to allocate discretionary resources to the various budgetary line items. Budget development workbooks are submitted for review and approval by the Superintendent and executive leadership staff. The finance staff compiles and reviews the budget development workbooks for quality control checks. All budgets are then aggregated by the various account code segments including (but not limited to) fund, location, function, and object code.

Community engagement and involvement of internal and external stakeholders is essential during the preparation phase of the budget process. The priorities and initiatives of the District are discussed openly, and a preliminary budget is presented to the Special Administrative Board for consideration by March. The preliminary budget is published for public display, and public forums are held for stakeholders. During the public forum, the District solicits feedback and input from stakeholders. Stakeholders are also encouraged to provide feedback through electronic forums established by the District.

The Special Administrative Board reviews the preliminary annual budget, and may conduct additional special meetings and forums as needed to clarify and address questions concerning the proposed budget. Prior to the final approval and adoption, the SAB may recommend additional adjustments to the preliminary budget.

Budget Adoption (May - June)

In May, the Superintendent presents the final budget for the ensuing year to the Special Administrative Board (SAB) for approval. After the final annual budget is approved by the SAB, the final budget is adopted through the required legal process. The adoption of the annual budget occurs before or by June.

Budget Implementation (July - June)

Passage of the motion to adopt the annual budget authorizes the approved revenues and expenditures. Budgets and staffing data for schools and central office locations are loaded into the enterprise resource planning (ERP) system for use during the fiscal year.

Evaluation (July - June)

Throughout the fiscal year, staffing allocations are evaluated, and adjustments are made based on staffing needs, compliance, and equity concerns. In September, school staffing allocations are reviewed to address staffing concerns influenced by differences in projected versus actual student enrollment and changes in instructional and support staff. Budgets may be revised to reflect the approved staffing adjustments.

Budgetary reports, including a budget verses actual report are made available to assist school and central office leaders with ongoing monitoring of cost center resources. Additionally, staff in the Finance Division monitors and adjusts budgets to ensure compliance with statutory and local policies. During the fiscal year, the Special Administrative Board will approve required budget adjustments. Occasionally, there may be significant adjustments that will require a budget amendment. In this instance, the Superintendent will present an amended budget to the Special Administrative Board for formal action to approve and adopt the amended budget in accordance with the legal requirements as established by statute.

Budgetary Controls

The District administration is responsible for establishing and maintaining an internal control structure designed to ensure that the District's assets are protected from loss, theft, and misuse. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. Budgetary control is established at the administration level and supports the assurances outlined above. Additionally, the budgetary controls are established to ensure compliance with legal provision embodied in the annual appropriated budget approved and adopted by the Special Administrative Board.

The level of budgetary control (the level at which expenditures cannot exceed the appropriated budget) is established at the fund level within each fund group. The District uses an encumbrance accounting system to facilitate budgetary control. The ERP system modules and features are designed to assist the administration with reviewing and performing the necessary budgetary checks that help control and prevent expenditures from exceeding budgeted amounts. Frequent and periodic reports are used to support the administration with performing budgetary control activities. By policy, the District may budget more expenditures than revenues, provided that sufficient unrestricted fund balance is available to cover such expenditures.

St. Louis Public Schools

Budget Highlights

The following highlights represent a brief overview of the significant items and initiatives that drive the proposed 2018-2019 Budget:

Transformation Plan and Budgeting

Saint Louis Public Schools is committed to long-range strategic and financial planning. The district uses a financial modeling tool that allows for multi-year planning for the allocation of budgeted resources. The financial planning tools inform and support the strategic plans for the district. The district recently concluded work established under Transformation Plan 1.0 and 2.0, and is endeavoring to meet the goals and objectives outlined in the newly revised and updated Transformation Plan 3.0. Transformation Plan 3.0, focuses on five primary goals that will allow the district to operate at a higher level, develop an inclusive environment for students and staff, and relentlessly use data to accomplish our goals. The goals are listed below:

1. The District created a system of excellent schools.
2. The District advances fairness and equity across its system.
3. The District cultivates culturally responsive school leaders, teachers and support personnel,
4. All students learn to read and succeed.
5. Community partnerships and resources support the District's Transformation Plan.

The Transformation Plan has significantly influenced the development of the annual budget for FY2019. Beginning in FY2016, the Finance Division was charged with managing a project developed under the Transformation Plan 2.0. The Budget Alignment Project was established in support of Goal: 1.2, SLPS will be financially sound and have a 10% unrestricted funds balance by 2019. The project focused on increasing awareness of the budget cycle, timelines, and processes, and improving the activities associated with the budget process including, but not limited to, enhancing activities associated with budget planning, development, monitoring, and evaluation.

At the close of the Budget Alignment Project, District leaders had engaged in opportunities to increase awareness of the budget process, providing them with an opportunity to use the budget as planning tool. The finance staff conducted additional meetings to provide updates and formal trainings to assist district leaders with budget development and on how to align resources with academic and operational goals. Newly developed budgeting tools and templates were prepared to assist district leaders with budget development. These tools and templates provided finance staff with more information that allowed better interpretation of how schools and central office allocate and align resources to support the annual budget.

The work performed under the Budget Alignment Project, assisted the financial staff with identifying additional needs and resources required to better align resources in the District. The Budget Alignment Project offered additional support for a new enterprise resource planning ERP system, a recommendation initiated by the District's administration. In FY2018, the District's administration recommended to the Special Administration Board (SAB) the purchase of a new ERP to manage human resources and financial information and transactions. The SAB approved the purchase and implementation of a new ERP system, Power School Business Plus. The transition to the new software started at the beginning of fiscal year 2019. The new software is designed to enhance financial and human resource activities and

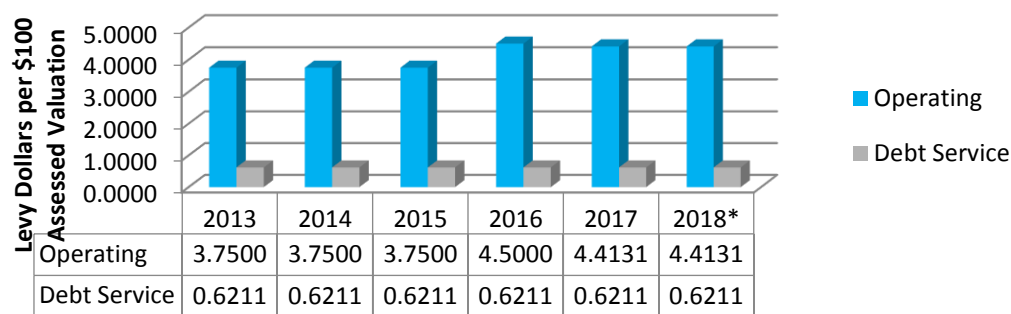

St. Louis Public Schools

capabilities, and provide more functionality to user. Specifically, the new software will reduce and eliminate manual budgetary processes, and provide more functionality with handling budget adjustments and approvals.

Tax Levy

Proposition 1: On April 5, 2016, voters overwhelmingly approved Proposition 1, the first operating tax levy increase to support SLPS in 25 years. Proposition 1 funds will be used to continue offering early childhood education, expand character and alternative education options, improve safety and security equipment and personnel, and offer competitive salaries to teachers and staff. The additional \$0.75 per \$100 of assessed valuation of tangible real and property taxes will generate an estimated \$28 million per year for SLPS and charter schools in St. Louis City. The operating tax rate supports general school operations while the debt rate supports the principal and debt payments on outstanding bonds. The chart below shows the estimated operating and debt tax rates for FY2017-18 and the previous four years. The tax levy for 2018, has not yet been prepared, and will be prepared in accordance with local statute.

SLPS Tax Levy by Fund 2013 - 2018

Desegregation Expansion Programs

The final year for the Desegregation Expansion Program contract concluded at the end of FY 2018. Staffing and discretionary resources that were previously funded by the program will supported by the District's general operating budget and grant resources.

Debt Limitation and Debt Capacity

The total principal amount of general obligation indebtedness in the District cannot exceed 15% of the value of taxable tangible property in the District according to the last completed assessment for state and county purposes at the time such bonds are approved by the voters. Based on \$4,283,177,298 net assessed valuation as of January 1, 2017 as adjusted through September 1, 2017¹, the current legal debt limit of the District is approximately \$642,476,595, excluding state assessed railroad and utility valuations and the District's available Debt Service Fund Balance. The total outstanding general obligation indebtedness of the District is \$269,632,917², resulting in a legal debt margin of the District of approximately \$372,843,678.

*The information, graphs, and charts depicted on pages 18 through 20 were provided by Stifel, the District's bond underwriters.

St. Louis Public Schools

Revenue Sources and Assumptions

Saint Louis Public Schools has four primary sources of revenues: local property taxes, local sales taxes, state-provided revenue, and federal funds. The largest components of local revenues are derived from taxes on commercial and residential property and a sales taxes applied to transactions during the fiscal year. State funding is based on state legislative appropriations determined through a finance system defined in statute. Federal funds are appropriated by the U.S. Congress, usually for specific purposes. In developing the revenue budget for FY2019, there are several pertinent assumptions relative to the estimated revenues available to the SLPS.

In April 2016, the voters overwhelmingly approved Proposition 1, an operating tax increase resulting in an additional \$28 million per year for SLPS and charter schools in St. Louis City. These funds are earmarked for early childhood education, expand character and alternative education options, improve safety and security equipment and personnel, and offer competitive salaries to teachers and staff. Other local revenue including Proposition C, a one cent education specific sales tax, are expected to decline by one percent. Additionally, Desegregation Expansion program funds are no longer available due to the conclusion of the contract the ended at the end of FY2018. Local building sales are expected to remain flat.

State revenue is primarily driven by enrollment and the subsequent Weighted Average Daily Attendance calculation. The District uses the Cohort Survival Method to project enrollment. Enrollment projections are prepared and made available at least twice throughout the fiscal year. Despite creative efforts and initiatives to increase student enrollment, the District has continued to experience enrollment declines over the past several years. The District will experience a decline of approximately \$9 million in state revenue due to the charter school allocation of Proposition 1 funds. Additionally, state pre-kindergarten revenue will decrease by \$800,000 (or 4%) due the decline in enrollment. The 2018-2019 Budget was prepared and based on October 2017 enrollment projections. Student enrollment is anticipated to slightly exceed 22,000, representing a four percent (4%) decline in FY2019.

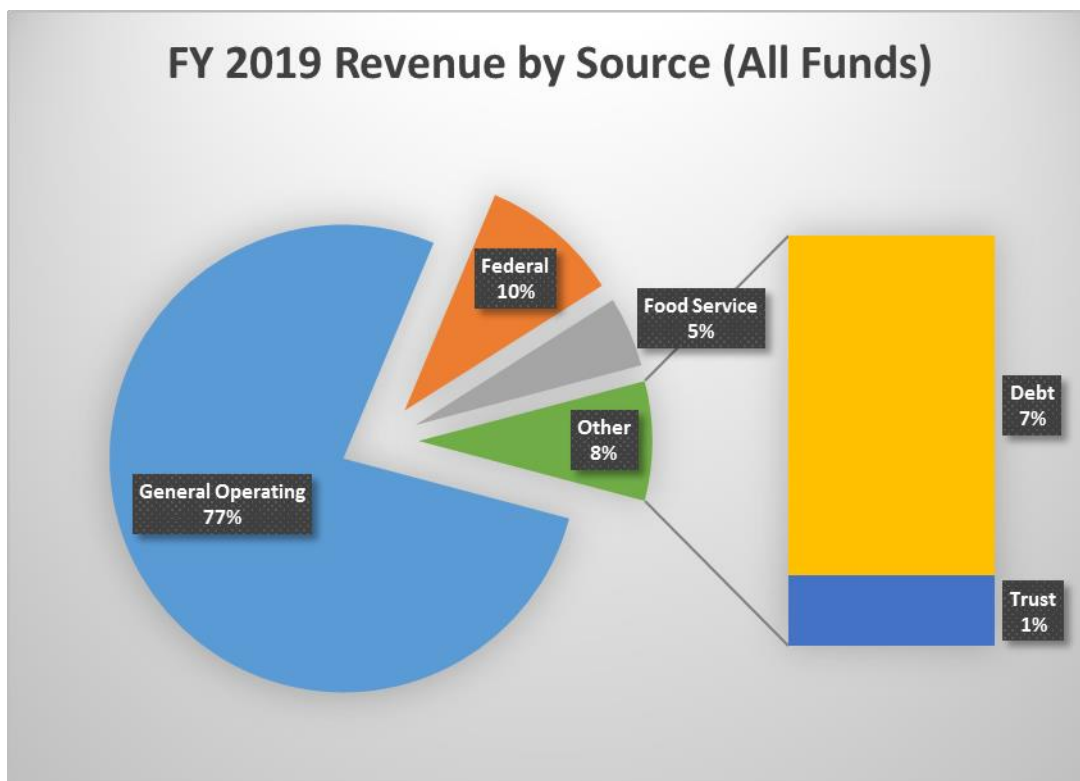

Federal revenue projections prepared to inform the 2018-2019 Budget reflected a minimal decline in federal revenue dollars. This decline is mostly due to the elimination of E-rate funding and grant awards outlined under the funding provided under Every Student Succeeds Act (ESSA). The district will continue to plan the use of carry forward amounts from the prior year.

Total Revenues	402,905,855	390,247,963	392,490,570

Expenditure Uses and Assumptions

The expenditure budget for FY2018 was developed with student needs as the highest priority and in collaboration with school and district leadership. Payroll expenditures, salaries and benefits, make up approximately 70% of total expenditures. The District continues to address challenges with offering competitive salaries. Although benefits declined overall, additional funds are budgeted for substitute and temporary employees who are eligible for medical benefits under the Affordable Care Act.

To compensate for the decline in federal revenue dollars, the district plans to allocate carry over funds to the areas requiring the most support, make reductions in the Title programs, and shift eligible expenses from federal to local funds.

St. Louis Public Schools

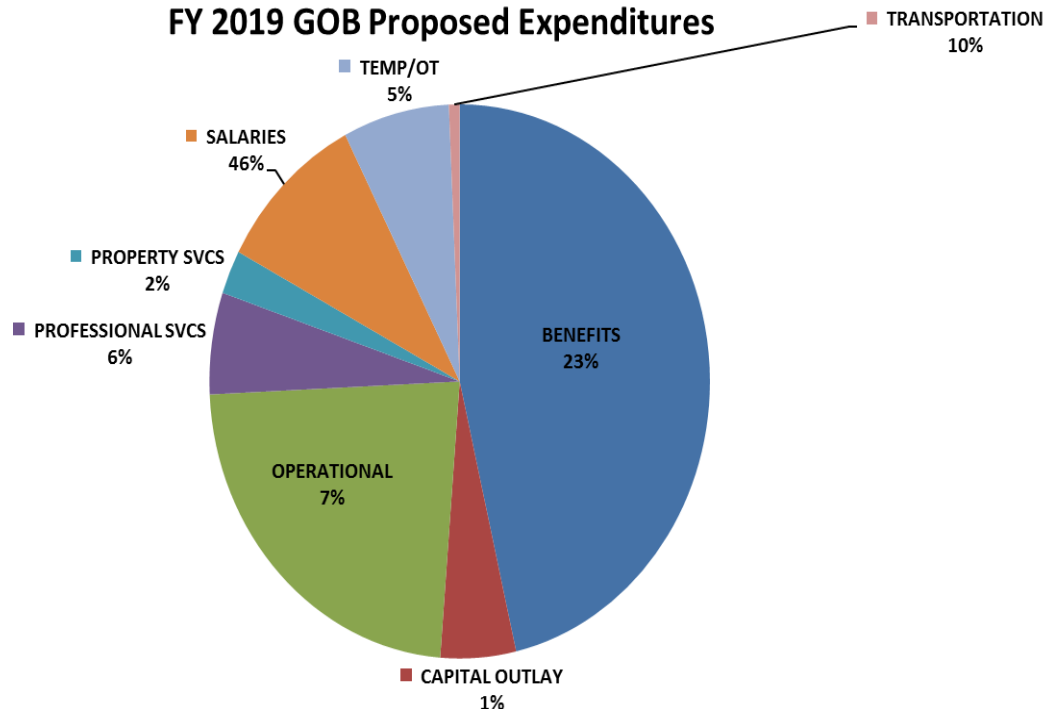

The General Operating Budget (GOB)

The general operating budget (GOB) is a subset of the district's operating funds as defined by the Department of Elementary and Secondary Education (DESE). The GOB is approximately 80% of the operating funds and is the least restrictive of all funds, comprised primarily of local and state funds.
