

From the desk of our nurse.....

We welcome you to Shenandoah Elementary School. As your nurse I hope you and your family are safe and healthy.

- Note especially our preschool 3 -5, and kindergarten year old children will need two MMR and Varicella vaccinations. **Current vaccination is the key to be able start school** .

Summer comes so fast and before you know it school starts: immunizations can be forgotten during the summer. Then it is difficult to get those immunizations before the 1st day of school.

- This **current up to date record** MUST be shared with the school nurse.
 - If you have an appointment for immunizations **the doctor signed note** must be shared with the nurse before school starts.
 - Doctor's orders are required for a child with asthma medication, along with an asthma action plan to keep your child safe at school.
 - Doctor's order must be given to the nurse regarding any food allergy with a food allergy plan.
 - Doctor's order and parents' signature are needed for any medication to be used at school. An adult must bring the medication with the signed form.
